

3 Days Workshop on Applied Econometrics

4 - 6 January, 2019

School of Economics,
Quaid-i-Azam University, Islamabad.

This workshop is an extension of thesis writing workshops series which is a regular feature of School of Economics. This workshop focuses on the empirical part of thesis writing and provides a rigorous training to research students and faculty members of various colleges, institutions and universities of Pakistan. In particular, this workshop will provide opportunity to learn applied skills of econometrics to participants from the remote areas of country where formal training opportunities are limited.

Resource Persons:

Dr. Eatzaz Ahmad
Professor
School of Economics,
Quaid-i-Azam University

Dr. Wasim S. Malik
Professor
Department of Economics,
University of Peshawar

Dr. Muhammad Idrees
Associate Professor
School of Economics,
Quaid-i-Azam University

Dr. M. Zahid Asghar
Associate Professor
Department of Statistics,
Quaid-i-Azam University

Dr. M. Tariq Majeed
Assistant Professor
School of Economics,
Quaid-i-Azam University

Workshop Objectives

This workshop focuses following aspects of empirical research in economics and other social sciences:

- *First*, it provides a quick refresher course of applied econometrics theories related to cross-sectional, time series and panel data analysis.
- *Second*, it provides the training on applications of theories using learning by doing exercises.
- *Third*, it trains the participants about interpretation of results and formal academic writing of the findings for thesis, conference paper and impact factor journals.

Learning Outcomes

The participants are expected to learn the following after attending the workshop:

- Develop necessary technical skills for understanding and applying applied econometric theories.
- Understand and overcome the common mistakes while analyzing cross sectional, time series and panel data.
- Be able to answer queries related to theory and interpretations of empirical part of the research.
- Be able to know how to transform an empirical research into publication.
- To help the participants regarding what examiners, reviewers and publishers want to see in empirical part of thesis/publication.
