SIXTH 5 DAYS WORKSHOP ON APPLIED ECONOMICS USING SOFTWARE Eviews, RATS, Stata, SPSS, LaTeX

ABOUT WORKSHOP

Indeed, the use of computer packages is increasing day by day in qualitative as well as in quantitative research. So the better understanding of these packages will enable researchers to conduct a reliable research. Therefore, keeping the importance in view, sixth 5 days' workshop on Applied Econometrics is planned to be held at School of Economics, Quaid-i-Azam University, Islamabad from July 24, 2017 to July 28, 2017. The experts of the Applied Econometrics of the prestigious universities will guide the participants to better understand different software along with the core concepts of the Applied Econometrics with real time data sets. The selection of the software is based on the strength of analysis and the power of the diagnostics. Furthermore, the use of primary and secondary data on different software will also be the part of learning.

WORKSHOP OBJECTIVES

The main objectives of the workshop are as under:

- a comprehensive understanding of the statistical tools available in various software.
- to introduce various estimation methodologies in different software by covering the almost whole applied econometrics for Economics and Management Sciences.
- to understand the various diagnostic tests to make sure health of the regression analysis.

WHO SHOULD ATTEND

The target participants of the workshop are the faculty members, PhD and MPhil students, and researchers at various institutes, who have to use software to teach or to conduct re-
